but Great. Should the Democracy fail to measure up to the height of the present opportunity, the next experiment in government in these United States will be a venture in Socialism. This is the last chance for the open game as American political traditions understand It; if we fall, the mass-play of a centralized government, stifling initiative, hardening and crystallizing the social structure and depriving the individual of the keenest joys of selfdirection will be all that will be left. While the Democracy fights, with the joy of the strong in the hour of conflict, it should not forget that for government as Jefferson understood it this is the last stand.

In this hour we ought to stop to remember just where our ultimate strength lies. It is not in the wisdom of our leaders, though the republic yields to none in appreciation of the invaluable services of Wilson, Marshall, Clark, Bryan, Underwood and other great Democrats of the present hour. But when we assume the actual burden of government, with the inevitable heartburnings, jealousies and misunderstandings that arise in the conduct of affairs, the exceptional powers of the few cannot save us.

The future of the Democracy turns on the extent to which the great fundamental principles of the party are really grasped by the minds and honored in the hearts of the great mass of Democrats of the rank and file. No passing mistakes of leadership can wreck a party bound by a common faith. What is really to be tested in the coming days is not the exceptional capacity of a few picked men; it the extent to which the millions Democrats in this broad land really ve and honor Democratic princi-

PRAIRIE SCHOONER SLOGAN, THAT STARTED FROM NEBRASKA.

Four horses abreast attached to a red painted prairie schooner, with windows and a protruding stovepipe, with the words, "Bound for Canada," on the schooner's side, was the object of considerable interest as it passed on the way northward from Nebraska a short time ago through the towns in Nebraska, South and North Dakota. After some weeks of strenuous travelthe overland trip from Jameson, Nebraska, and with his little family made the regular customs entry at North Portal, in the province of Saskatchewan. Their destination was Willow Bunch, a district that Mr. Jensen had selected as one in which it was possible for him to work out his fortune. He located on a good half section of land, and intended putting on it some cattle that would fatten on the wild prairie grass that grows so luxuriously in that district. In addition to this his purpose was to cultivate a portion of it and raise wheat, cats, barley or flax. In short, a life devoted to mixed farming was what he had in view and it is easy to understand that he will make a success of it, and in a year or so will attach some more land holdings.

Although his beginning may be small, it may safely be said that Mr. Jensen, like thousands of others who have begun life in western Canada on no more and with probably much less, will prosper. He will not be far from a line of railway. Schools will be close at hand and other social conditions so necessary in a new country are available.-Advertisement.

New Yorker Might Say Goodby to Watch and the \$50 He Had Confidingly Given Up.

in a subway crowd not long ago a New York man was "touched" for his watch. The watch was not valuable, but the New York man wanted it back for sentimental reasons, and inserted divers advertisements in the papers, offering \$50 for the return of the watch and "no questions asked."

The "dip" who had "lifted" the watch saw the advertisement and concluded to take the \$50. He called on the New York man, handed him the timepiece and demanded the reward The owner of the watch was only

too happy to give it to him. After examining the watch he returned it to his pocket and handed over five \$10 bills. The "dip" pocketed the money and departed. There was little said. A few minutes later the New York man reached for his watch. It was gone.

Now! while one rooster occupies comparatively little space, and while a casual visitor to the city might not notice ing in this way, Mr. J. F. Jensen made him, the principle of the thing is wrong. One tourist might see that rooster and fail to see the old palace; and his report on Santa Fe would feature the fact that it had no facilities for interring or removing defunct roosters.

Let no visitor to the Oldest Newest city in the United States see unburied roosters on our street corners. It is the little things that go to make the big impressions. Every rooster removed and buried makes Santa Fe one rooster the cleaner, one rooster the brighter and more attractive.

HAD NO NEED OF THE BIBLE Students Very Much in Error When

They Thought They Could Embarrass Henry Ward Beecher.

A good story is told about the late Henry Ward Beecher, who was accustomed to find his inspiration wherever he might open the Bible. He was preaching once before the Harvard students. One of the students in a spirit of deviltry removed the Bible from the altar and substituted Webster's dictionary. The word was passed around, and as the noted divine ascended the pulpit the colle gians leaned back to enjoy the fun. Dr. Beecher adjusted his glasses and opened the book.

"My text this morning," he began, is taken from the Song of Solomon Then, as casually as if nothing had happened he went on: "I am the rose of Sharon and the lily of the valleys. As the fily among thorns, so is my love among the daughters. As the apple tree.
